JoinFS for Pilots. A few notes to help you with JFS.	
SETTING UP JOINFS FOR THE FIRST TIME ON THE CIX VFR CLU	JB HUB (CIX HUB)
FIRST SETUP JFS CIX HUB	
If this is your first time using JFS, you will not have the 'CIX HUB' installed. This File View	Help
is what you will see when you type in CIX HUB. Nothing happens.	r ip JFS address Create
You need to go to the -	
Forum\NOTAMS\permanent\JoinFS "CIX HUB" Address.	
There you will find the "CIX HUB" Address, (copy it) and the latest version	Network Join Global
number of JoinFS. Below, session window, opposite control window 33.2 Map	38,0 JoinFS.net Forum
THE SETTINGS WINDOW. Most of the entries are self explanatory.	Network
1. [Below Password]Check 'whazzup txt' box is ticked.	Auto refresh Choose my own port 6113 Join global session at launch
2. Circle of activity, Visible range for this session - from your A/C. If you see	Low bandwidth 1 Text Auto broadcast VRS TacPack
the A/C of another group, reduce this setting to less than their range.	Password Password whazzup bt ♥ -include global users □
3. Follow distance. Press Ctrl & F and you will be this distance behind	- include AI IT
the A/C you highlighted.	Enable Hub Mode Domain 109.153.114.50
4. XPlane users will need	Show Nickname 🔽
a) To install the JFS plugin.	Show Callegn Voice Server Show Distance Voice Server Next Event
b) Check you have C++2017 (or later) installed.	Show Speed XPlane Enable Install Plugin
c) Enable X-Plane 'enable' and 'TCAS' tick boxes ticked.	Address 127.0.0.1 Instal C++ 2017
d) To have Xplane running FIRST for JFS to connect.	quency 123.150 Reset OK Cancel
I Recommend downloading and reading IFS manual from the IFS web site.	
	IFS IIIX
Back to your JoinES window Open File	iew Help
Address Book. This is what you will see.	Greate
If it is the first setup there will be no entry if the address has changed, it will show	HUB Join
YOUR current settings, Right click on the window/entry and select EDIT. Enter/Edit	
the name and Address as required. On the right is what you will see, when	
connected to CIX HUB, the top window will show your JFS ip.	map 50,2 John Shet Forum
JOINING A SESSION - CIX HUB - on JoinFS	
If you know at which airfield the session is located, it is easier to setup your Flight Sim first. ATC might be waiting.	
Otherwise starting JFS first might help you find them. Open your JFS. Join CIX HUB. (If it is not there see above). Or.	
As above, setup at the departure Airfield. If you see ATC up and connected, spawn up there.	
Click Join Network should connect Open View/Session and you	
should see anyone else in CIX HIIB. In this view, David and nev are in	Ignore Permissions Aircraft Objects Port Version Simulator O 0 6112 3.1.2 Not Connected
the JES CIX HUB session. David's simulator is connected to JES.	I 0 6112 3.1.2 Microsoft Flight Sim □ 0 0 6112 3.1.2 Not Connected
Nev is in the session, but simulator not connected.	ulator not setup / connected to CIX HUB. NO ATC connected : Simulator - FSX, is also set up.
In this view, nev is in JFS CIX HUB and is also connected as ATC	X
(ESJFS) at Shoreham as approach.	Ignore Permissions Aucraft Objects Pot Version Simulator 0 0 6112 3.1.2 Not Connected 1 715 6112 3.1 Microsoft Elinible
Sim not connected as EuroScope is in use.	nev is EGKA_APP - ATC - thus his flight simulator is not connected
This is the Aircraft window, with your A/C in the session;	X
Sim. connected to JFS, no other A/C connected.	Sub Model Wind Weather Broadcast Record
This window does not indicate your CIX HUB status.	t in CIX HUB or all alone
Note, the information you see about your A/C and	
(at the bottom) any A/C you highlight currently yours.	Microsoft Flight Simulator X
Distance and bearing will be from your A/C to the selected	
A/C.	ading to sort aircraft
If the A/C you are going to fly with are already setup, when connected to both IES and CIY	HUB (in the Aircraft
window), select one of them and press CTRI +F and you will be a few feet behind them in the air or on the ground	
The information above should enable you to determine what you have done and need to do to join a JoinFS session	
with or without ATC. Enjoy your flying with the CIX VFR CLUB. {The latest version of JoinFS has a link to the SIMCOM X	
downloads, web site. Under File.}
